

# Emmeti Tamperproof Room Thermostat

Emmeti's wall mounted Tamperproof thermostats give you peace of mind that temperature settings cannot be changed by unauthorised persons. The thermostat is available in 230V and 24V and has the option for remote sensors enabling the thermostat to be used in bathroom applications.

It is an elegant white design, measuring only 85mm x 85mm x 31mm (WxHxD). In addition, the thermostat features a red LED indicating when the system is calling for heat.

The thermostat has a differential of only 0.5°C, with an adjustment dial beneath the tool removable cover

## Benefits:

- Red LED light shows when the thermostat is calling for heat
- Adjustable night setback temperature for improved day and night comfort
- Suitable for 230V or 24V operating with switching load up to 5 amps
- Accurate temperature control for maximum comfort – differential 0.5°C

Technical Specification	
Power supply:	U9132075 230V U9132085 24V
Power absorption:	1VA
Regulation range:	6°C – 30°C
Night set back:	2°C - 7°C (default 4.5°C)
Sensor type:	NTC 4.7k @25°C internal
Contact rating:	5 (1) A @ 250V - SPDT
Protection grade:	IP30
Operating temperature:	0°C - 40°C
Storage temperature:	-10°C - +50°C
Humidity limits:	20% - 80% RH (non-condensing)
Dimensions:	85 x 85 x 31 mm (W x H x D)
Weight:	135g
