

Heatmiser Edge-e

Heatmiser Edge-e is a 230v Electric Floor Heating Thermostat.

With Edge-e, a single or multiple Wireless Air Sensors can be paired to the thermostat. When multiple sensors are used, the average temperature is calculated and is perfect for larger open plan properties.

In addition to the wireless air sensor, a wireless window/door switch can be paired to the edge-e Thermostat, automatically switching the heating to Standby Mode whilst the window/door is open and then returning to normal mode when the window/door is closed.

The Heatmiser edge-e can operate in Thermostat or Timer mode. When operating in Thermostat mode, the edge can be paired to our Wireless Air Sensor where a number of options are available.

- Built in Air Sensor Only
- Built In Air and Wireless Air Temperature Averaging
- Single Remote Wireless Air Sensor Only
- Multiple Remote Wireless Sensors Averaging

Technical Specification	
Set Temperature Range	5-35° C, 41-95° F
Cool White Back Lit Screen	Y
Non-Programmable mode	Y
5/2 day programming Mode	Y
7 day programming Mode	Y
24 hour Mode	Y
Number of Heating Levels	4 or 6
Advance Function	Y
Optimum Start	Y
Number of Switching Times (Timer mode)	4
Holiday Function	Y
Keylock Function	Y
Temperature Hold Function	Y
Temperature Override	Y
Temperature Override Limit	Y
Output Delay	Y
Frost Protection (7° C - 17° C):	Y
Daylight Saving Time (DST)	Y
°C / °F Option	Y
Built In Air Sensor	Y
Remote Air Sensor (Wireless)	Y
Floor Sensing Mode (Wired)	Y
Remote Probe Included	Y
Floor Temp Limit Protection	Y
Cooling	N
Max Switching Current	16A
Modbus (Maximum 32 Devices)	Y
Accuracy +/-	1° C
Adjustable Switching Differential	0.5° C – 3° C
Supply	230V AC
Installed dimensions (L x H x D):	90 x 90 x 14mm
Weight:	162g

Stock Code

Edge-e

Product Name

Heatmiser Edge-e

Colour

White
